

ADC-DMA/5BF

Adapter Cable: DVI-A (M) to 5 BNC (F)

Kramer's **ADC-DMA/5BF-1** is a short adapter cable designed to adapt between the analog pins of DVI-I and typical RGBHV. DVI video cards often output signals in both digital and analog format and, conversely, display devices often accept an analog VGA type signal using a DVI connector.

FEATURES

- **Quality Construction** - Rugged 1 ft cable with molded connectors and gold plated pins.
- **Compatibility** - Use this adapter when you need access to the analog signal present at a DVI-I source, or when you need to connect analog VGA to a display which provides only a DVI-I input. Note that this adapter does not convert analog to digital or digital to analog. Always verify compatibility details for the source/destination in your application.
