

## **C-DMA/5BM**

DVI -A to 5 BNC Breakout Cable

---

Kramer's C-DMA/5BM series DVI male to 5 BNC male are cables designed to adapt between the analog pins of DVI-I and typical RGBHV. DVI video cards often output signals in both digital and analog format and, conversely, display devices often accept an analog RGBHV type signal using a DVI connector.

### FEATURES

- **Quality Construction** - Rugged cable with molded connectors and gold plated pins.
- **Compatibility** - Use this adapter when you need access to the analog signal present at a DVI-I source, or when you need to connect analog RGBHV to a display which provides only a DVI-I input. Note that this adapter does not convert analog to digital or digital to analog. Always verify compatibility details for the source/destination in your application.
- **Varied Selection of Lengths** - Available in 3, 6, 10 and 15ft versions (0.9 to 4.6m).
